Doc Type: Working Group Document

Title: Revision of the N1846 Proposal to add Extended Ethiopic to the BMP of the UCS
Source: Quality and Standards Authority of Ethiopia, Ethiopia
Status: Member Body Contribution
Action: For consideration by JTC1/SC2/WG2 and UTC
Date: 2004-04-16

This document requests additional characters to be added to the UCS and contains the proposal summary form. It replaces N1846 and is derived from the current national character set standard of Ethiopia.

A. Administrative

1. Title:	Revision of the N1846 Proposal to add Extended Ethiopic to the BMP of the UCS
2. Requester's name:	Quality and Standards Authority of Ethiopia (contact: Daniel Yacob <yacob@geez.org>)
3. Requester type (Member body/Liaison/Individual contribution):	Member body contribution
4. Submission date:	2003-04-16
5. Requester's reference (if applicable):	The QSAE standard document ES 781:2002, N1846 (1998-09-11)
6. Choose one of the following:	
This is a complete proposal:	Yes
or, More information will be provided later:	No

B. Technical - General

1. Choose one of the following:	
a. This proposal is for a new script (set of characters):	No, but it is a proposal for a new block of Ethiopic characters.
Proposed name of script:	Extended Ethiopic
b. The proposal is for addition of character(s) to an existing block:	
Name of the existing block:	
2. Number of characters in proposal:	115
3. Proposed category (select one from below - see section 2.2 of P&P document):	
A-Contemporary	<input checked="" type="checkbox"/>
B.1-Specialized (small collection)	<input type="checkbox"/>
B.2-Specialized (large collection)	<input type="checkbox"/>
C-Major extinct	<input type="checkbox"/>
D-Attested extinct	<input type="checkbox"/>
E-Minor extinct	<input type="checkbox"/>
F-Archaic Hieroglyphic or Ideographic	<input type="checkbox"/>
G-Obscure or questionable usage symbols	<input type="checkbox"/>
4. Proposed Level of Implementation (1, 2 or 3) (see Annex K in P&P document):	Level 3
Is a rationale provided for the choice?	Both spacing and no spacing characters are proposed.
If Yes, reference:	See the bibliography in Section D
5. Is a repertoire including character names provided?	Yes
a. If YES, are the names in accordance with the "character naming guidelines" in Annex L of P&P document?	Yes
b. Are the character shapes attached in a legible form suitable for review?	Yes
6. Who will provide the appropriate computerized font (ordered preference: True Type, or PostScript format) for publishing the standard?	QSAE
If available now, identify source(s) for the font (include address, e-mail, ftp-site, etc.) and indicate the tools used:	standards@qsae.org, Macromedia Fontographer
7. References:	
a. Are references (to other character sets, dictionaries, descriptive texts etc.) provided?	Yes, see the bibliography in Section D
b. Are published examples of use (such as samples from newspapers, magazines, or other sources) of proposed characters attached?	Yes
8. Special encoding issues:	
Does the proposal address other aspects of character data processing (if applicable) such as input, presentation, sorting, searching, indexing, transliteration etc. (if yes please enclose information)?	A collation reference is provided (Note: apart from the use of combining marks no complex rendering processing is required).

9. Additional Information:

Additional information has been provided in an extra "Section D" and appendices A – G.

C. Technical - Justification

1. Has this proposal for addition of character(s) been submitted before? Yes _____
 If YES explain: Many characters in this proposal can be found in N1846. Unlike N1846, the present proposal is based on the national standard of an ISO member nation (Ethiopia). The present proposal may be considered a refinement and follow up to N1846.

2. Has contact been made to members of the user community (for example: National Body, user groups of the script or characters, other experts, etc.)? Yes _____
 If YES, with whom? This proposal is submitted by the Quality and Standards Authority of Ethiopia
 If YES, available relevant documents: ES 781:2002, the national character set standard of Ethiopia

3. Information on the user community for the proposed characters (for example: size, demographics, information technology use, or publishing use) is included? _____
 Reference: _____

4. The context of use for the proposed characters (type of use; common or rare) The characters are essential for commonly used orthographies of the languages of Awngi, Bench, Blin, Me'en, Mursi, Qimant, Sebatbeit (aka Chaha), Suri and Xamtanga. The tonal marks have ecclesiastical use, the gemination mark has education and linguistic use and the paragraph separator is general punctuation in older manuscripts.
 Reference: See the bibliography of Section D _____

5. Are the proposed characters in current use by the user community? Yes _____
 If YES, where? Reference: Ethiopia and Eritrea _____

6. After giving due considerations to the principles in the P&P document must the proposed characters be entirely in the BMP? Yes _____
 If YES, is a rationale provided? Yes _____
 If YES, reference: Living script in current use; also in accordance with the UCS Roadmap

7. Should the proposed characters be kept together in a contiguous range (rather than being scattered)? Yes, they should be encoded in a single block as presented here.

8. Can any of the proposed characters be considered a presentation form of an existing character or character sequence? No _____
 If YES, is a rationale for its inclusion provided? _____
 If YES, reference: _____

9. Can any of the proposed characters be encoded using a composed character sequence of either existing characters or other proposed characters? No _____
 If YES, is a rationale for its inclusion provided? _____
 If YES, reference: _____

10. Can any of the proposed character(s) be considered to be similar (in appearance or function) to an existing character? Yes _____
 If YES, is a rationale for its inclusion provided? Yes, the ETHIOPIC ALTERNATE PARAGRAPH SEPARATOR is similar to ETHIOPIC PARAGRAPH SEPARATOR at character address x1368. While the symbols are generally identical in function, the alternate paragraph separator has a distinct appearance and some historical documents contain both symbols. The ability to preserve this distinction in encoded representation of historic documents is considered important enough that the alternate paragraph separator has been included in the ES 781:2002 standard. It is the opinion of some members of the ES 781 committee that the punctuation may also have been applied for indentation. Conclusive evidence of this usage was not available at the time to this request.
 If YES, reference: See the bibliography in Section D under Alternate Paragraph Mark

11. Does the proposal include use of combining characters and/or use of composite sequences? Yes _____
 If YES, is a rationale for such use provided? Yes _____
 If YES, reference: See the bibliography in Section D under Ethiopic Tonal and Gemination Marks
 Is a list of composite sequences and their corresponding glyph images (graphic symbols) provided? _____
 If YES, reference: _____

12. Does the proposal contain characters with any special properties such as control function or similar semantics? No _____
 If YES, describe in detail (include attachment if necessary) _____

<p>13. Does the proposal contain any Ideographic compatibility character(s)? No _____</p> <p style="padding-left: 40px;">If YES, is the equivalent corresponding unified ideographic character(s) identified? _____</p> <p style="padding-left: 40px;">If YES, reference: _____</p>
--

D. Proposal

UCS Amendment 10 defines a basic Ethiopic syllabary satisfying the needs of the most widely spoken languages of Ethiopia. This proposal provides an extension to the basic syllabary for languages with smaller populations of speakers. This proposal is derived directly from the Ethiopian national standard of 2002, ES 781:2002, and contains only those elements not addressed by Amendment 10.

The development of ES 781:2002 was an open process where solicitations were made for public participation over the Internet and in the most widely circulated newspaper of Ethiopia. More than 50 government agencies and private experts were contacted directly. These efforts lead to 126 pages of comments from respondents. Public participation was also encouraged in a series of advertised workshops hosted by the Quality and Standards Authority of Ethiopia between 1998 – 2002. We feel that through this extensive process that the ES 781 standard, and this proposal, are representative of the existing and continuing orthographic needs of the peoples of Ethiopia.

The proposed letter symbols share the same property types as do their previously defined counterparts. The 10 tonal marks are identified as annotation symbols, special spacing rules, such as for line breaking, are not applicable to them. The two punctuation symbols assume the common properties of other punctuation in their respective categories. Character names in the following properties table are in keeping with the UCS naming convention for Ethiopic elements.

Appendix A: The ES 781:2002 Ordered Character Set

The collation of Ethiopic text elements is defined on a per language basis as each language employs only a subset of the national unified syllabary and may do so in different orders. Language specific collation rules are left to the representative bodies of each language to define. The following table specifies the collation order, as a whole in a language independent context, of Ethiopic text elements as defined in the ES 781:2002 national standard of Ethiopia. Extension elements are highlighted in red.

Appendix D: A Me'en Syllabary from “ፔን ዴ ቱሞኛ ሸዕኦ ማርቆስ ተኛ”

The image shows two pages from a book titled "ፔን ዴ ቱሞኛ ሸዕኦ ማርቆስ ተኛ". The pages contain a Me'en syllabary, where each character is paired with a small illustration. The top page features a red box highlighting a section of the syllabary. The bottom page also has a red box highlighting a section. The illustrations include various objects like a sun, a table, a bag, a bird, and animals like a cow and a sheep. The text is written in Me'en script, which is a syllabic system. The book is open, showing the gutter in the middle.

Appendix F: Ethiopic Tonal Marks

The Ethiopian Orthodox Church uses a system of annotation to record and recite hymns. Under church canon the system was devised by St Yared who lived from 513 – 579 CE (505-571 EC). The system in modern form is composed of roughly 150 annotations and contains the set of the 20 Ethiopic numerals (often sans the lower line), 121 abbreviated words and 10 unique marks not represented by letter symbols. The annotation is made on three rows above a line of text (from bottom upward formally named: Ge’ez, Ezel and Ararai). Each row is a different mode for how the passages are to be voiced during different ceremonies. Ge’ez (the name of the language but also meaning “the first” in many contexts) is the plain chant for ordinary days; Ezel is a more measured beat for funerals, the Ezel row is often written in red ink for distinction; Ararai is a lighter, freer mood for festivals.

The hymns are a vital part of Orthodox liturgy in the present day and the additional symbols are essential to preserving this nearly 1500 year old tradition. The Zaima symbols (tonal marks) are continually published in books year after year but in hand written calligraphic form as they remain unsupported by publishing technology. In some cases the symbols are handwritten above typeset text. As hand rendered text, the shapes of the symbols may vary from calligrapher to calligrapher. The following table presents the symbols in representative forms and approximate translations and associate religious symbolism as presented in *YeZaima Arist Milikt*:

	Yizet (ደዘት) – Indicates a pause or emphasis on the letter of a word while chanting. It symbolizes God’s omnipotence.
	Deret (ደረት) – Indicates the letter where the rhythm stops and the pitch rises. It symbolizes how God raised Jesus from the dead.
	Rikrik (ርከርከ also አረከርከ) – Indicates where the rhythm stays on one word and the vocal chord shows the repeat of the rhythm. It symbolizes the dripping of Jesus’ blood when he was struck and hung on the cross.
	Short-Rikrik (ጎጲር ፡ርከርከ) – The second form of Rikrik used to indicate a shorter duration.
	Difat (ደፋት) – Indicates the voice pitch should fall at the start of the letter. It symbolizes that our Lord Savior Jesus Christ descended onto earth and came into this world.
	Kinat (ቅናት) – Helps the rhythm to hold the last breath and rises. It symbolizes how jealously lead to the death of Jesus.
	Cheret (ቄረት) – Indicates where the rhythm picks up over a word or can pull it backward and forward. It symbolizes the scars where Jesus Christ was whipped.
	Hidet (ኢደት) – Indicates that the chant spans more than 2, 3 or 4 words and shows how the rhythm progresses. It symbolizes how Jesus teaches all over.
	Deret-Hidet (ደረት፡ኢደት) – Deret and Hidet as they occur together to indicate a continuing and rising pitch.
	Kurts (ቀርቆ also ቁርቁ) – Indicates how the rhythm holds the last word and pauses. In this case the rhythm does not have the characteristic of literature when read. It symbolizes how Jesus came to the world to save the people, it shows his determination.

The symbols are generally written ¼th the height of regular letters and in a few cases have additive properties. Most notably the full and short Rikrik marks can be stacked (preferred when row context conflicts do not occur) or placed side-by-side as space allows. Each dot then provides a measured “count” for the duration that the tone is held. Two short Rikriks combine for a 4 beat count, a full and short Rikrik combine for a 5 beat count and two full Rikriks combine for a 6 beat count. Note that the full Rikrik *can not* combine with Yizet to indicate a sequence of 4 dots as an equivalence to two short Rikriks as their functions are strictly different.

The following samples illustrate the mixed use of the short and full Rikrik marks:

Selot Kidasie p. 9

YeZaima Arist Milikt p. 264

Zimarie WeMewas'et p.1

Selot Kidasie p. 35

Noteworthy in the following sample are the disproportional sizes in the dots of the Yizet and Short Rikrik marks above the 2nd and 6th letters:

YeZaima Arist Milikt p. 21

As a calligraphic system of annotation up to this point, there is no known precedence for the rendering of the symbols in typesetting software. It is anticipated however that software capable of handling Kanbun marks, Ruby and similar systems of interlinear annotation, will be readily adaptable to the requirements of Ethiopic tonal notation.

The following page presents a basic sample of the notation system from page 25 of *YeZaima Arist Milikt*. The ten symbols are identified within the sample.

- Yizet
- Deret
- Rikrik
- Short-Rikrik
- Diffat
- Kenat
- Chiret
- Hidet
- Deret-Hidet
- Kurt
